

# MONDAY

- What is the time?
- Name a six-sided 2-D polygon.
- $L = 1000 \text{ mL}$
- $5 + 9 =$
- How many faces are on a cube?
- Which is heavier, a tonne or a kilogram?
- $7 \times 11 =$
- $6 + 7 =$
- 3, 6, 9,
- $3 \times 8 =$
- $\$4.00 + \$3.50 =$
- How many days are in August?
- Which number is not prime?  
**2 5 7 14**
- Circle the fifth letter: A, B, C, D, E, F.
- $15 < 3$  ☐ true ☐ false
- $4 \times 50 =$
- Are these shapes congruent?
- Shaded area = squares
- Perimeter = cm
- Emilie had 32 jellybeans to share with her 4 friends. How many jellybeans do each of her friends get?

# TUESDAY

- What is the time?
- Draw a rectangle.
- How many faces are on this pyramid?
- In 341, what is the place value of the 3?  
☐ 100s ☐ 10s ☐ 1s
- $1 \text{ m} =$  cm
- Round 645 (nearest 100).
- What is the sum of 3 and 9?
- Shaded area = squares
- $8 + 8 + 8 =$
- $12 \div 3 =$
- What is the total cost of buying 4 m of rope at  $\$3.00$  per metre.
- Name this 2-D shape.
- $\$1.00 - 50\text{c} =$
- 4, 8, 12,
- The date is 18 May. What will the date be in one week?
- $56 - 10 =$
- How many triangles can you find?
- $4^2 =$  x =
- Jakob had to give 8 classrooms 9 footballs each. How many footballs were there?
- Write the number sentence for Question 19.  
x =

# WEDNESDAY

- What is the time?
- A quadrilateral has sides.
- How many faces are on this prism?
- $10 \text{ mm} =$  cm
- If you go surfing at 4 o'clock in the afternoon, is it 4 am or 4 pm?
- Shaded area = squares
- $28 \div 4 =$
- Tick the direction from A to B.  
North-east ☐  
South-east ☐  
North-west ☐  
South-west ☐
- $10^2 =$  x =
- How many triangles can you find?
- 7, 14, 21, 28, , 42
- $\$2.00 - \$1.25 =$
- 5, 10, 15,
- How many days are in May?
- Write a prime number between 0 and 10.
- $12 - 9 =$
- Will a square tessellate?
- Name this 3-D shape.
- $1000 \text{ g} =$  kg
- $4 + 8 + 5 =$

# THURSDAY

- What is the time?
- Name an 8-sided polygon.
- How many faces are on this pyramid?
- $600 \text{ cm} =$  m
- How many months are in winter?
- Perimeter = m
- $18 - 6 =$
- The shaded area = squares
- $25 \div 5 =$
- $7 \times 6 =$
- Write as a fraction.
- 3, 6, 9, 12,
- $9^2 =$  x =
- How many days are in a fortnight?
- How many triangles can you find?
- Write a prime number between 10 and 20.
- $2 > 3$  ☐ true ☐ false
- $\$2.00 - \$1.70 =$
- Is symmetrical?
- $7 + 4 + 5 =$
